

How to make Himalayan Rock Salt Diffuser

Equipment Included:

- Himalayan Rock Salt
- Classic Clear Bowl Jar
- Essential Oil
- Pipette

Equipment Not Included:

- Paper towel

Line your work area with a protective covering. It is recommended to use indoors.
Product not edible. Keep out of reach of children.

STEP 01

Place 500gm Himalayan Rock Salt in the Clear Bowl Jar. You want enough rock salt to hold the essential oils but leave room in the jar for air to circulate.

STEP 02

Add approximately 10 drops of Essential Oil to Himalayan Rock Salt. Adjust quantity to your preference. Remember, essential oils are concentrated, so a little goes a long way.

STEP 03

Let the essential oils absorb into the salt for a few hours. This allows the scent to infuse into the salt.

STEP 04

Place the bowl in your desired location. It could be in a bathroom, bedroom, living room, or any space you want to freshen up the air.

STEP 05

Re-apply essential oil as needed: The scent will naturally fade over time. When you want to refresh the rock salt, simply add more drops of essential oil.
