Tart, Pillar and Melt Wax

TECHNICAL DATA SHEET

DESCRIPTION:

Orchid Wax Pillar and Melt Wax is a high-quality soy blend wax manufactured in the United States. Designed specifically for melts, tarts, votives and pillar candles.

Orchid Wax Pillar and Melt Wax is available in flake form for easy usage. It creates outstanding melts and pillar candles.

Contains Paraffin.

HEATING:

Use water base to melt wax in steel container (double boiler, do not place container on direct heat).

Do not exceed 200°C.

Do not leave wax unattended over heat source.

Melting point is 65°C.

pouring temperature is 65-70°C.

NOTE:

Store in a cool, dry place and away from direct sunlight.

Always test wick, fragrance and colour with wax to ensure it meets your requirements. Seek advice from your supplier to obtain suitable colourants and additives for your candle formula.

INSTRUCTIONS:

Heat wax flakes and stir continuously until completely melted.

Add colour and fragrance at recommended amounts; stir until completely dissolved. Recommended pouring temperature is 65-70°C.

TYPICAL PROPERTIES:

- Melting Point: 65°C
